# ARCHITECTURAL & SCULPTURAL MEMORIALS IN BRONZE

Since 1800 B.C. men have wrought works of art in bronze and brass to symbolize their highest aspirations. Scientific tests conducted by the United States Government confirm the test of time that bronze will withstand the elements for thousands of years. In all our memorial and ecclesiastical work we use only U. S. Standard Bronze—a combination of virgin metals of known and tested quality.

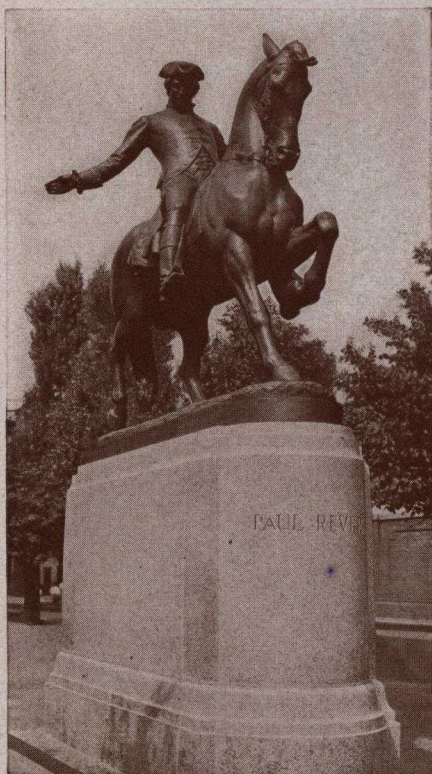

The integrity of McGann Bronzes and Ecclesiastical Brasses is assured by the fidelity with which this organization has adhered to the highest ideals—working for three generations under the close personal supervision of a member of the same family.

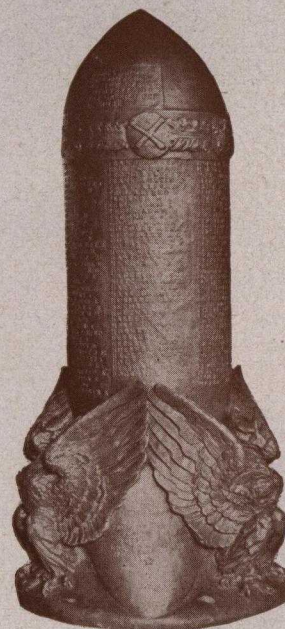

As a result, the name has grown to symbolize metal and workmanship of the highest character.
